

Chef (fe) de Projet R&D – Volaille

Aviwell is seeking a **Project Manager** with **work experience in the poultry sector** to manage projects involving poultry development, intestinal microbiome, and integrative multi-omics studies. You will be part of an expert multidisciplinary team working on development of novel live microbial products for animals at our new facilities on the Paul Sabatier University campus in Toulouse, France. If you are looking to strengthen your expertise within a varied and dynamic environment, then this is a fantastic opportunity.

Aviwell is a biotech company with a mission to nourish tomorrow better...in a sustainable world thereby respecting natural resources. We develop innovative processes for the identification and production of natural bacterial communities to improve the growth of farm animals according to market needs. We currently have products on the market such as the Naturally Fatty liver (non-force-fed) from geese. Aviwell is continuing to develop our research platform to produce these unique products for a global market. Aviwell is recruiting a Lead Scientist who will coordinate specific animal programs (R&D) to support the scientific and technical developments and testing of direct fed microbial combinations.

Summary of Job Responsibilities:

- You will manage all steps of the research and development programs poultry that includes contracting with CRO, suppliers, potential private and academic partners
- You will drive all the aspects of an R&D program: research, cost, intellectual property, regulatory (FDA/EFSA)
- You will interact with the bioinformatics, biostatistics, and microbiology plateaus of the company
- You will report to the CSO and CTO and provide daily management of technicians

Qualifications and Experience:

- Minimum Education: Ph.D. or MS in biology/agrifood science or related discipline
- At least 3 years of demonstrated experience in the Agriculture/Biotechnology sector
- Expertise in poultry production for food; experience in other systems a strong plus (swine, aqua)
- Knowledge of microbiology and biostatistics will be a plus
- Fluent in French, professional level English

Skills:

- Work effectively with international teams; verbal and written communication is effective with multi-disciplinary groups.
- Work is well-organized, high-quality, and timely.
- Able to balance concurrent tasks and responsibilities.
- Bring creative ideas and make suggestions for program optimization.

The position is available as a CDI and the salary will be competitive with bonus opportunities depending on experience. Qualified applicants will be quickly invited for interviews. The expected start date for the position is in May 2021.

Applicants must provide a "Cover Letter" describing their experience related to poultry studies. Each file name must include the name of the applicant and can be sent by email with the subject “**Chef de Projet R&D - Volaille**” to Recruitment@aviwell.fr
