

Do you wish to be an active player in the sustainable use of raw materials in animal nutrition?
Are you looking for an exciting opportunity to put your knowledge in animal physiology & health and leadership skills into action?

**Adisseo is looking for its:
Science Manager (f/m/d) Feedstuffs Raw Material & Digestibility (R&I NUTSAT)**

Adisseo is one of the world leaders in the field of additives for animal feed. The group relies on its 10 research and technology centers (around 200 persons), and its production sites based in Europe, the United States and China to design, produce and market nutritional solutions for sustainable animal feed. It employs more than 2,000 people and, thanks to its global distribution network, serves more than 3,900 customers in around 100 countries.

We develop and support exciting new products and concepts for the animal nutrition and health industry. Our competence center (Center of Expertise and Research in Nutrition, 45 people) brings together complementary expertise for Research and Innovation in Nutrition and Animal Health (monogastric). Our work revolves around a scientific, creative and international environment where your scientific experience in feedstuffs and their digestive physiology impact in monogastric will be key for the development of new sustainable solutions for animal nutrition.

Your main responsibilities will be part of the R&D strategy around monogastric (poultry and swine) nutrition and health. You will:

- Bring relevant explanations about feedstuffs: their biochemical composition, their antinutritional factors, their nutritional value and their sustainable use
- Update and consolidate the NIR database and bring relevant propositions to better value the use of NIR data in the different regional contexts
- Execute innovation project in your field of expertise and drive these from ideation to the market introduction
- Be responsible for scientific programs building and enriching the innovation portfolio by identifying product opportunity and / or risks related to the emergence of new raw materials for animal nutrition
- Ensure the communication on your projects, internally and also externally
- Develop and maintain your expertise through network

The main requirements for this position include solid knowledges in raw material chemistry:

- Animal nutritionist or agronomist by training; PhD level would be a plus
- Good knowledge in poultry and/or swine nutrition and particularly digestive physiology and health
- Good knowledge of research management practices and trial design, monitoring and exploitation
- Excellent communication skills, both written and verbal
- Fluent English - French and / or Chinese would be a plus

Location: This position will be located in France (possibility in Lyon, Antony or Commeny).

Interested in this position? Please apply by sending your CV & motivation letter in English to Estelle.Devillard@adisseo.com or aurelie.preynat@adisseo.com
