

Do you want to play of key role in a Research and Innovation mission to serve Sustainable Development and Animal Welfare? Do you want to join a dynamic and innovative organization serving Animal Nutrition and Health?

**Adisseo is looking for its:
Science Manager (f/m/d) Health by Nutrition, microbial ecology (R&I NUTSAT)**

Adisseo is one of the world leaders in the field of additives for animal feed. The group relies on its 10 research and technology centers (around 200 persons), and its production sites based in Europe, the United States and China to design, produce and market nutritional solutions for sustainable animal feed. It employs more than 2,000 people and, thanks to its global distribution network, serves more than 3,900 customers in around 100 countries.

We develop and support exciting new products and concepts for the animal nutrition and health industry. Our competence center (Center of Expertise and Research in Nutrition, 45 people) brings together complementary expertises for Research and Innovation in Nutrition and Animal Health (monogastric). Our work revolves around a scientific, creative and international environment where your scientific experience in microbial ecology will be key for the development of new sustainable solutions for animal nutrition.

The position offers great opportunities for interactions between disciplines in order to develop and test new nutritional solutions for improving monogastric health.

Your main responsibilities will be part of the R&D strategy around monogastric (poultry and swine) nutrition and health. You will:

- Anticipate, foresee and position differentiating scientific novelties related to microbial ecology
- Bring Innovation projects from Proof of Concept level to Market introduction in your field of expertise
- Bring relevant explanation of the effects and functioning of marketed Adisseo products, services and solutions related to microbial ecology
- Ensure the communication on your projects, internally and also externally
- Develop and maintain your expertise through network

The main requirements for this position include solid experience in microbial ecology,

- Doctorate in microbiology or equivalent
- Good knowledge of monogastric nutrition or monogastric health would be a real plus
- Project management should drive you
- Good communication and networking skills, team spirit and innovation
- Fluent English - French and / or Chinese would be a plus

Location: This position will be located in France (possibility in Lyon, Antony or Commentry).
